

# LOOP ANTENNA

## Model: ANT01, ANT02

Loop antenna has two different sizes, can match Andea mid range and long range reader. Parameter deviation can be fine-tuned through integrated tunable circuit and keep antenna in good condition when environment changing. This loop antenna is specifically designed for high-performance assembly line to read small amount tags in mid-range, such as production automation, parcel sorting, etc.

### Technical Specification

Model Name	ANT01	ANT02
Operating Frequency	13.56Mhz	
Interface	SMA	
Impedance	50 Ω	
Maximum Power	6W	
Reading Range (Max)	100cm	65cm
Dimension (L*W*H)	832*612*30mm	350*330*22mm
Feeder Length	2m	
Housing Material	PC+ABS	
Weight	2750g	770g

ANT01

ANT02
